

# *Are you in control of State aid?*

*PwC's State Aid Desk is a multidisciplinary expert group which brings together our tax advisors, lawyers, accountants and economists who are all specialised in State aid matters.*

## *PwC's State Aid Desk*

We have set up the State Aid Desk, which is a multidisciplinary group of experts aiming to assist you in identifying and managing EU State aid risks from a tax, legal, accounting and economics perspective.

### *How can we help?*

We analyse and assess the practical problems and risks and opportunities that you may encounter in your company and make sure that you are in control of EU State aid risks.

- We examine available routes for certain financial or tax arrangements in light of the EU State aid rules and identify the pros and cons of each route for you.
- We review fiscal State aid positions for audit purposes.
- We issue legal opinions and memoranda on the compatibility of (corporate) income tax provisions with State aid law.
- We review the compatibility of tax rulings and advanced pricing arrangements with EU State aid law.
- We analyse if State aid is required by conducting market failure analysis.
- We assess the market conformity of the state support to examine whether this support can be considered State aid.
- We assist clients during the entire notification procedure.
- We participate in seminars and conferences and knowledge sharing activities across Europe with our clients on fiscal State aid developments.
- We have access to PwC worldwide and European networks on all four disciplines.
- We closely monitor tax policy and EU State aid policy through our excellent contacts with the European Commission in Brussels.
